SUMMARY

Cybersecurity student with hands-on lab experience in threat analysis, SOC alert triage, and network reconnaissance. Currently interning as a Cybersecurity Analyst at VicyTech with a DFIR focus, with introductory OT security knowledge. Also experienced in applying machine learning to security problems (phishing and fake-news detection). Seeking opportunities to support SOC, DFIR, and Threat Intelligence teams.

WORK EXPERIENCE

Cybersecurity Analyst Intern · VicyTech — Aug 2026 – Feb 2027
Remote

- 6-month remote internship (Cybersecurity department, Mon-Fri) focused on Digital Forensics & Incident Response (DFIR) and machine learning for security.

AI & ML Intern · IICT, New Delhi — Jun 2026 – Jul 2026

- AI-Driven Phishing Email Detection (NLP): engineered TF-IDF plus 6 structural/metadata features (URL count, urgency-word flags, capitalization ratio) on a 53,964-email dataset; Random Forest reached 98.23% accuracy (F1 = 0.983), ahead of Logistic Regression (96.66%) and MLP (95.37%).
- AI-Powered Fake News Detection: built an NLP pipeline from scratch (text cleaning, TF-IDF, training and evaluation) on the ISOT dataset (39,105 articles); Random Forest reached 99.58% accuracy (F1 = 0.996) against KNN, Logistic Regression, and MLP.
- Authoredtwo IEEE-format technical reports covering methodology, model comparison, confusion matrices, and feature-importance interpretation.

AI/ML Intern · Infosys Springboard Internship 7.0 (Batch 5) — Oct 2026 – Present

- Selectedfor the Virtual Internship 7.0 program (final confirmation pending document verification) after completing the 8-week AI Empowerment preparatory track.
